Dear Bill,

I'm pleased to verify your reception of WVVW on Jan. 24, 1988 from 12:00 to 12:30am EST.

Our transmitter is a Harris MW1 (1000 watts- solid state) feeding a 234 ft. tower.

I received several reports on the test from Ontario, Quebec, Illinois, Tenn., Wisconsin, Ct., Penn., and New Jersey.

It was nice talking to you during the test.

Sincerely,

Bob Eddy
